Kieu Chan Dong

Backend Developer Intern | C#/.NET

Ho Chi Minh City, Vietnam | kieudong555@gmail.com | GitHub | LinkedIn

Software Engineering student focused on backend APIs, service integrations, and application reliability.

Education

FPT University | Bachelor's degree in Software Engineering, expected 2028

Technical Skills

Backend: C#, .NET, ASP.NET Core Web API, Entity Framework Core, LINQ

Data and cloud: SQL Server, PostgreSQL, Cloudflare R2, Azure, Vercel, ngrok

Testing and tools: Unit testing, integration testing, Git, Docker

Additional: Java, Python

Projects

VeganHelper-System | Backend Contributor | 2026
Validated AI moderation responses in ASP.NET Core. Added provider error handling and regression tests. Deployed frontend and backend to Azure and used Cloudflare R2 for images.

AI-Study-Companion | Primary Developer | 2026
Built and operated a hackathon learning app, integrated a local Ollama model, constrained its response formats, and fixed backend API timeouts.

Remnant | Gameplay Programmer | 2026
Developed core gameplay logic in C# with a team of Digital Design students.

Competitions

Global Hackathon 2026 | AI-Study-Companion

NASA Space Apps Challenge | Human Binoculars, in development
Developing backend APIs for SPHEREx imagery and analysis results, with responsibility for API contracts, processing, and deployment.

Certifications

Software Engineering Specialization | HKUST, Coursera | Apr 2026

Object Oriented Programming in Java | UC San Diego and Duke University, Coursera | Mar 2026
